Parvél: Students of Pillai College, New Parvél, got an opportunity to interact with the managing director of Airbus, South Asia, in the Parvél campus and to know about the engineering processes that Airbus adopts in the manufacturing of aircraft. Airbus is the leading manufacturer of aircraft which supplies the same to most of the nations across the world.

Last week, Ajay Mehra, managing director, South Asia of Airbus visited Pillai's education complex in New Parvél and interacted with students and faculty members. He spoke to the students about the engineering processes that Airbus adopts in the manufacturing of the planes. He also explained the technological advancement in the field of aeronautical industry.

Mehra highlighted the current economical scenario across the world in his speech and showed his concern

Inspiring minds

Ajay Mehra, managing director, South Asia of Airbus visited Pillai's education complex in New Parvél and interacted with students and faculty members

According to faculty members, Mehra's address was very enlightening for all the students as well as faculty members, which included a number of subjects from various fields

about how it has been impacting the business of large multinational companies like Airbus.

According to faculty members, Mehra's address was very enlightening for all the students as well as faculty members, which included a number of subjects from various fields including management. He also shared his role models and techniques of leadership used in the corporate world, by giving examples from his personal experiences.

"He explained us the negotiating skills in the business at global level, the various global

business terminologies and rules and regulations in different parts of the world," said a student. He added that Mehra has 40 years of experience in the corporate global world, so, listening to his growth curve in the industry was like music to the ears for young engineering and management students.

The seminar was organised as a sequel to the visit of Pillai students to Airbus manufacturing plant in France. Students had visited the Airbus manufacturing plant and seen the assembly line.

The event was also attended by the members of management board of Mahatma Education Society, Dr Vasudevan Pillai, Dr Daphne Pillai and Dr Priam Pillai.

The interactive session was organised by engineering and management section of Pillai's group. Dr RIK Moorthy, principal of PIIT also shared his views on the changing technology and the need for adaptation for graduate engineers.
